Notes:

1. This document has been developed by the National Training Department to provide a list of the current revision of training material required for program qualification and AUXOP courses. All items listed have been reviewed by responsible departments and confirmed as the latest revision. Earlier or previous editions of training material are obsolete and should not be used or retained, with the exceptions listed in Note 2. This document can be downloaded from the National Training website at [www.auxtdept.org](http://www.auxtdept.org).
2. For the “New Member Course” any test that is still in the field may be used but new orders from ANSC will include the updated tests. It is encourage that any stockpile of existing materials be exhausted rather than destroyed.
3. The Examination column lists the written exams. Note that Specialty Exams must be requested from DIRAUX (not ANSC) in accordance with District policy. In addition to written exams, on-line exams for most topics are available through the National Testing Center at <http://ntc.cgaux.org>.
4. The four numerals in bold are the ANSC item numbers which should be used when ordering material.
5. Contact Ken Kendall, DC-Td at [LBI42@comcast.net](mailto:LBI42@comcast.net) for any corrections, comments or questions.
